

4th KNP Science
Networking Meeting

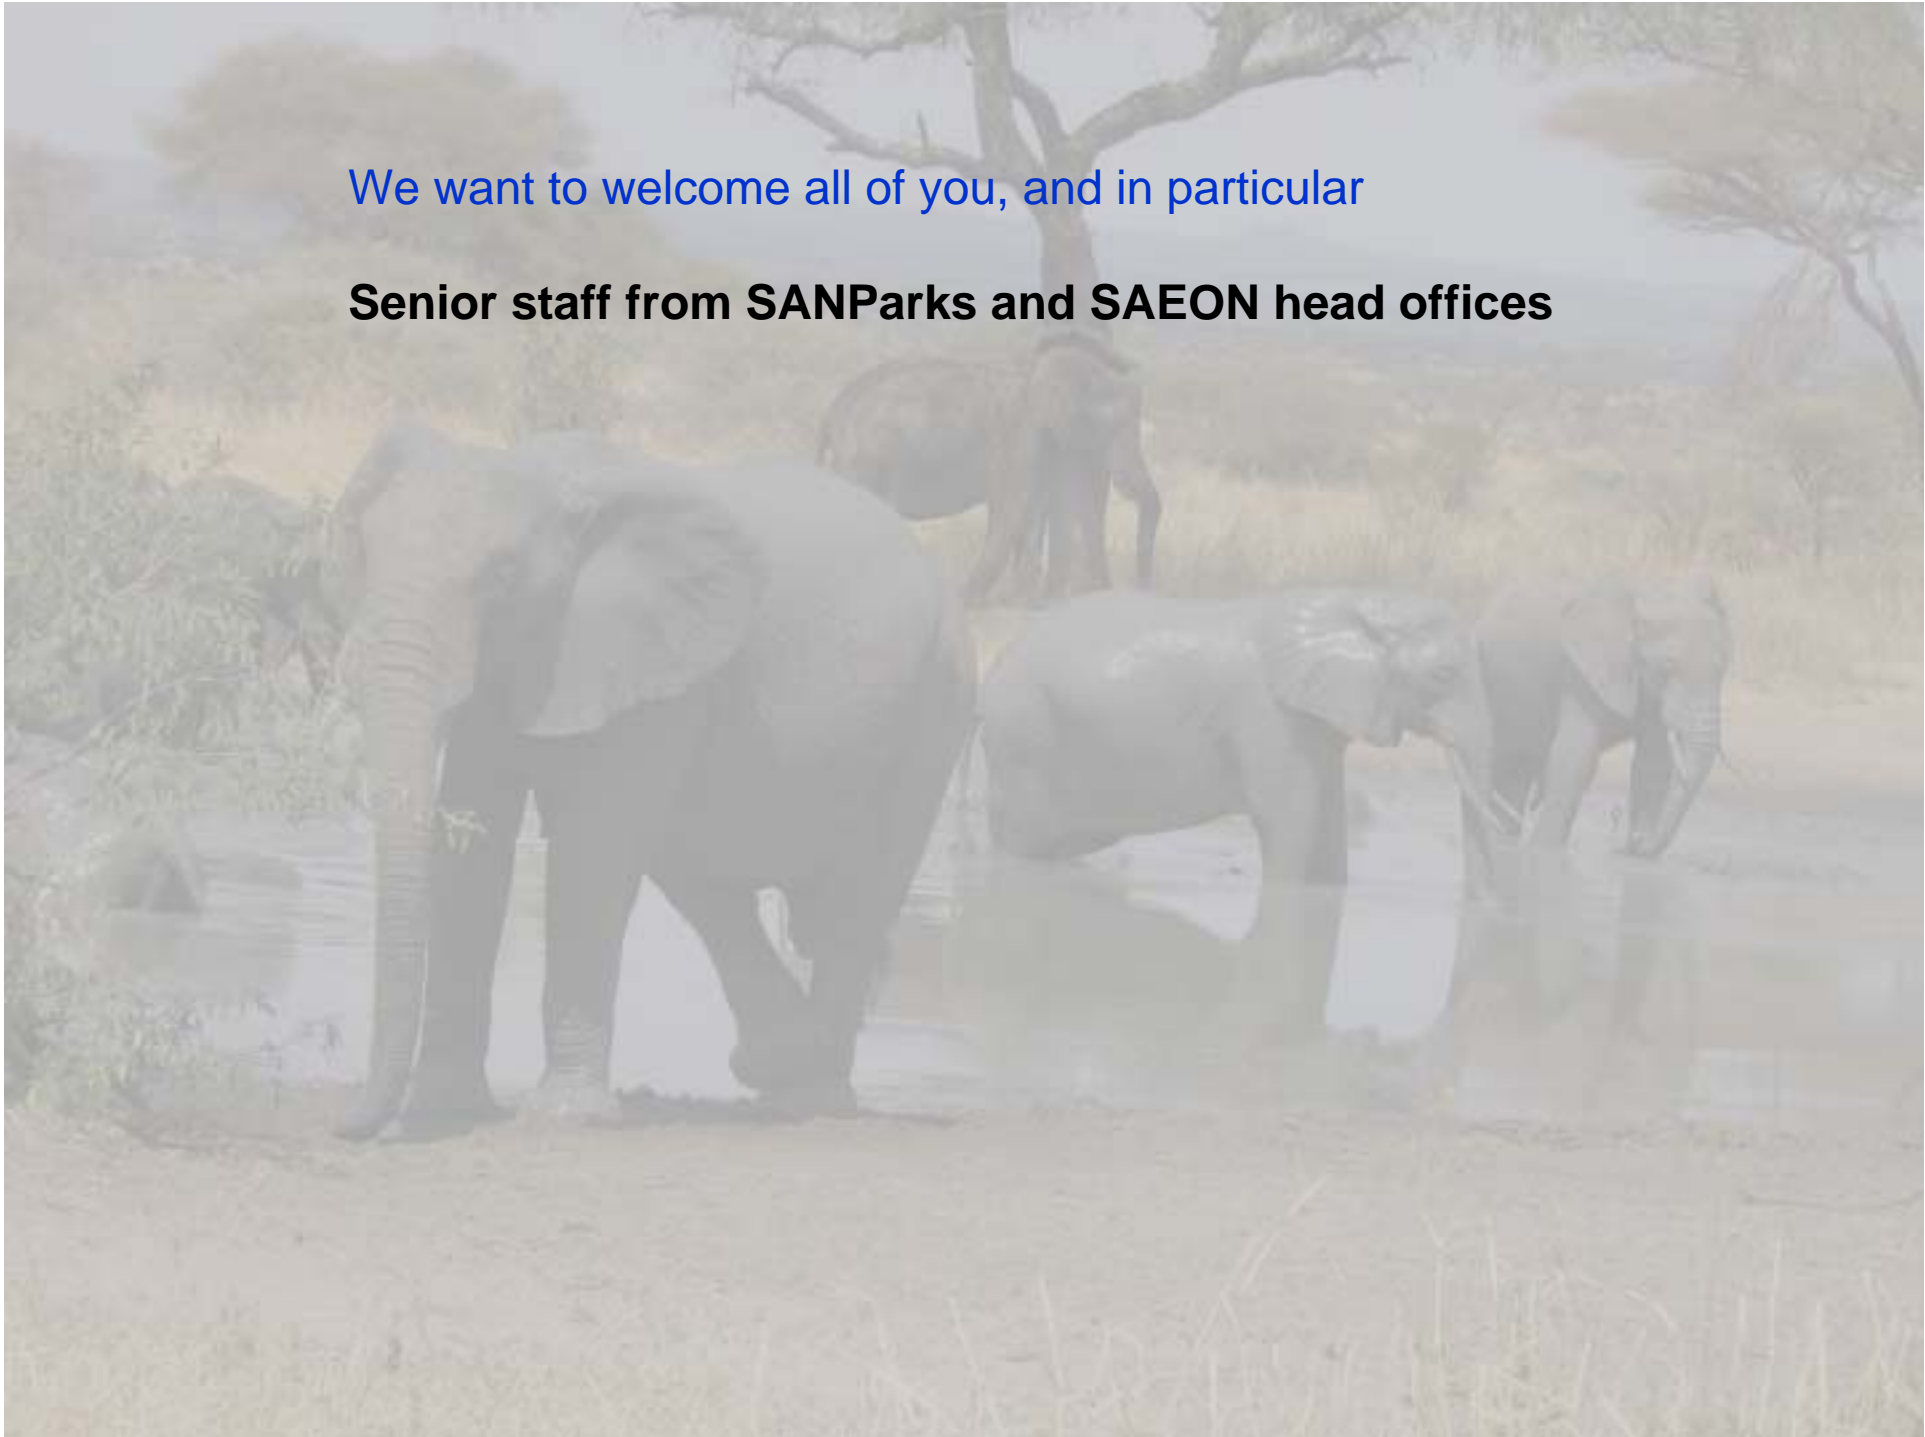

We want to welcome all of you, and in particular

We want to welcome all of you, and in particular

Senior staff from SANParks and SAEON head offices

We want to welcome all of you, and in particular

Senior staff from SANParks and SAEON head offices

Dr Mkhize, executive director of Kruger National Park

A photograph of a herd of elephants in a savanna landscape. In the foreground, a large elephant stands on the left, facing left. To its right, a smaller elephant is partially visible. In the background, another elephant is standing near a watering hole. The background shows a savanna with scattered trees and a hazy horizon. The entire image is overlaid with a semi-transparent grey filter.

We want to welcome all of you, and in particular

Senior staff from SANParks and SAEON head offices

Dr Mkhize, executive director of Kruger National Park

Those who have traveled far to be here for this meeting

A herd of elephants is shown in a savanna landscape. The elephants are in the foreground, with some standing and others partially visible. The background features a large tree and a hazy horizon. The entire image is overlaid with a semi-transparent grey filter.

We want to welcome all of you, and in particular

Senior staff from SANParks and SAEON head offices

Dr Mkhize, executive director of Kruger National Park

Those who have traveled far to be here for this meeting

Those who are new and here for the first time

THE GOOD NEWS

The Networking meeting is growing in popularity !!!!!!!

THE GOOD NEWS

The Networking meeting is growing in popularity !!!!!!!

This year over 200 people registered, we have 85 presentations (& over 20 posters) – covering a broad range of savanna ecology

THE GOOD NEWS

The Networking meeting is growing in popularity !!!!!!!

This year over 200 people registered, we have 85 presentations (& over 20 posters) – covering a broad range of savanna ecology

THE BAD NEWS

We only have three and a half days.

This year over 200 people registered, we have 85 presentations (& over 20 posters) – covering a broad range of savanna ecology

THE BAD NEWS

We only have three and a half days.

THE SOLUTION

Decided to be inclusive and to hear all, but that meant a trade-off,

Less time for each to speak – and resulting in a shift in the old program style

THE GOOD NEWS

The Networking meeting is growing in popularity !!!!!!!

This year over 200 people registered, we have 85 presentations (& over 20 posters) – covering a broad range of savanna ecology

THE BAD NEWS

We only have three and a half days.

THE SOLUTION

Decided to be inclusive and to hear all, but that meant a trade-off,

Less time for each to speak – and resulting in a shift in the old program style

We understand that there are risks and costs associated with this approach

THE GOOD NEWS

The Networking meeting is growing in popularity !!!!!!!

This year over 200 people registered, we have 85 presentations (& over 20 posters) – covering a broad range of savanna ecology

THE BAD NEWS

We only have three and a half days.

THE SOLUTION

Decided to be inclusive and to hear all, but that meant a trade-off,

Less time for each to speak – and resulting in a shift in the old program style

We understand that there are risks and costs associated with this approach

We ask you to understand this and to try and get the most out of it, even if you do not particularly like the format

THE GOOD NEWS

THE BAD NEWS

We only have three and a half days.

THE SOLUTION

Decided to be inclusive and to hear all, but that meant a trade-off,

Less time for each to speak – and resulting in a shift in the old program style

We understand that there are risks and costs associated with this approach

We ask you to understand this and to try and get the most out of it, even if you do not particularly like the format

For this reason we have asked the session chairs to be very tight on time.
We ask you to respect this and to prepare your talk for the allotted time.

Thank those involved in organizing:

Thank those involved in organizing:

(program and name tags)

A herd of elephants is shown in a savanna landscape. The elephants are of various sizes, including a large adult and several smaller calves. They are standing on a dirt path or near a body of water. The background features acacia trees and a hazy horizon. The entire image is overlaid with a semi-transparent blue filter.

Rina Grant my co-organizer

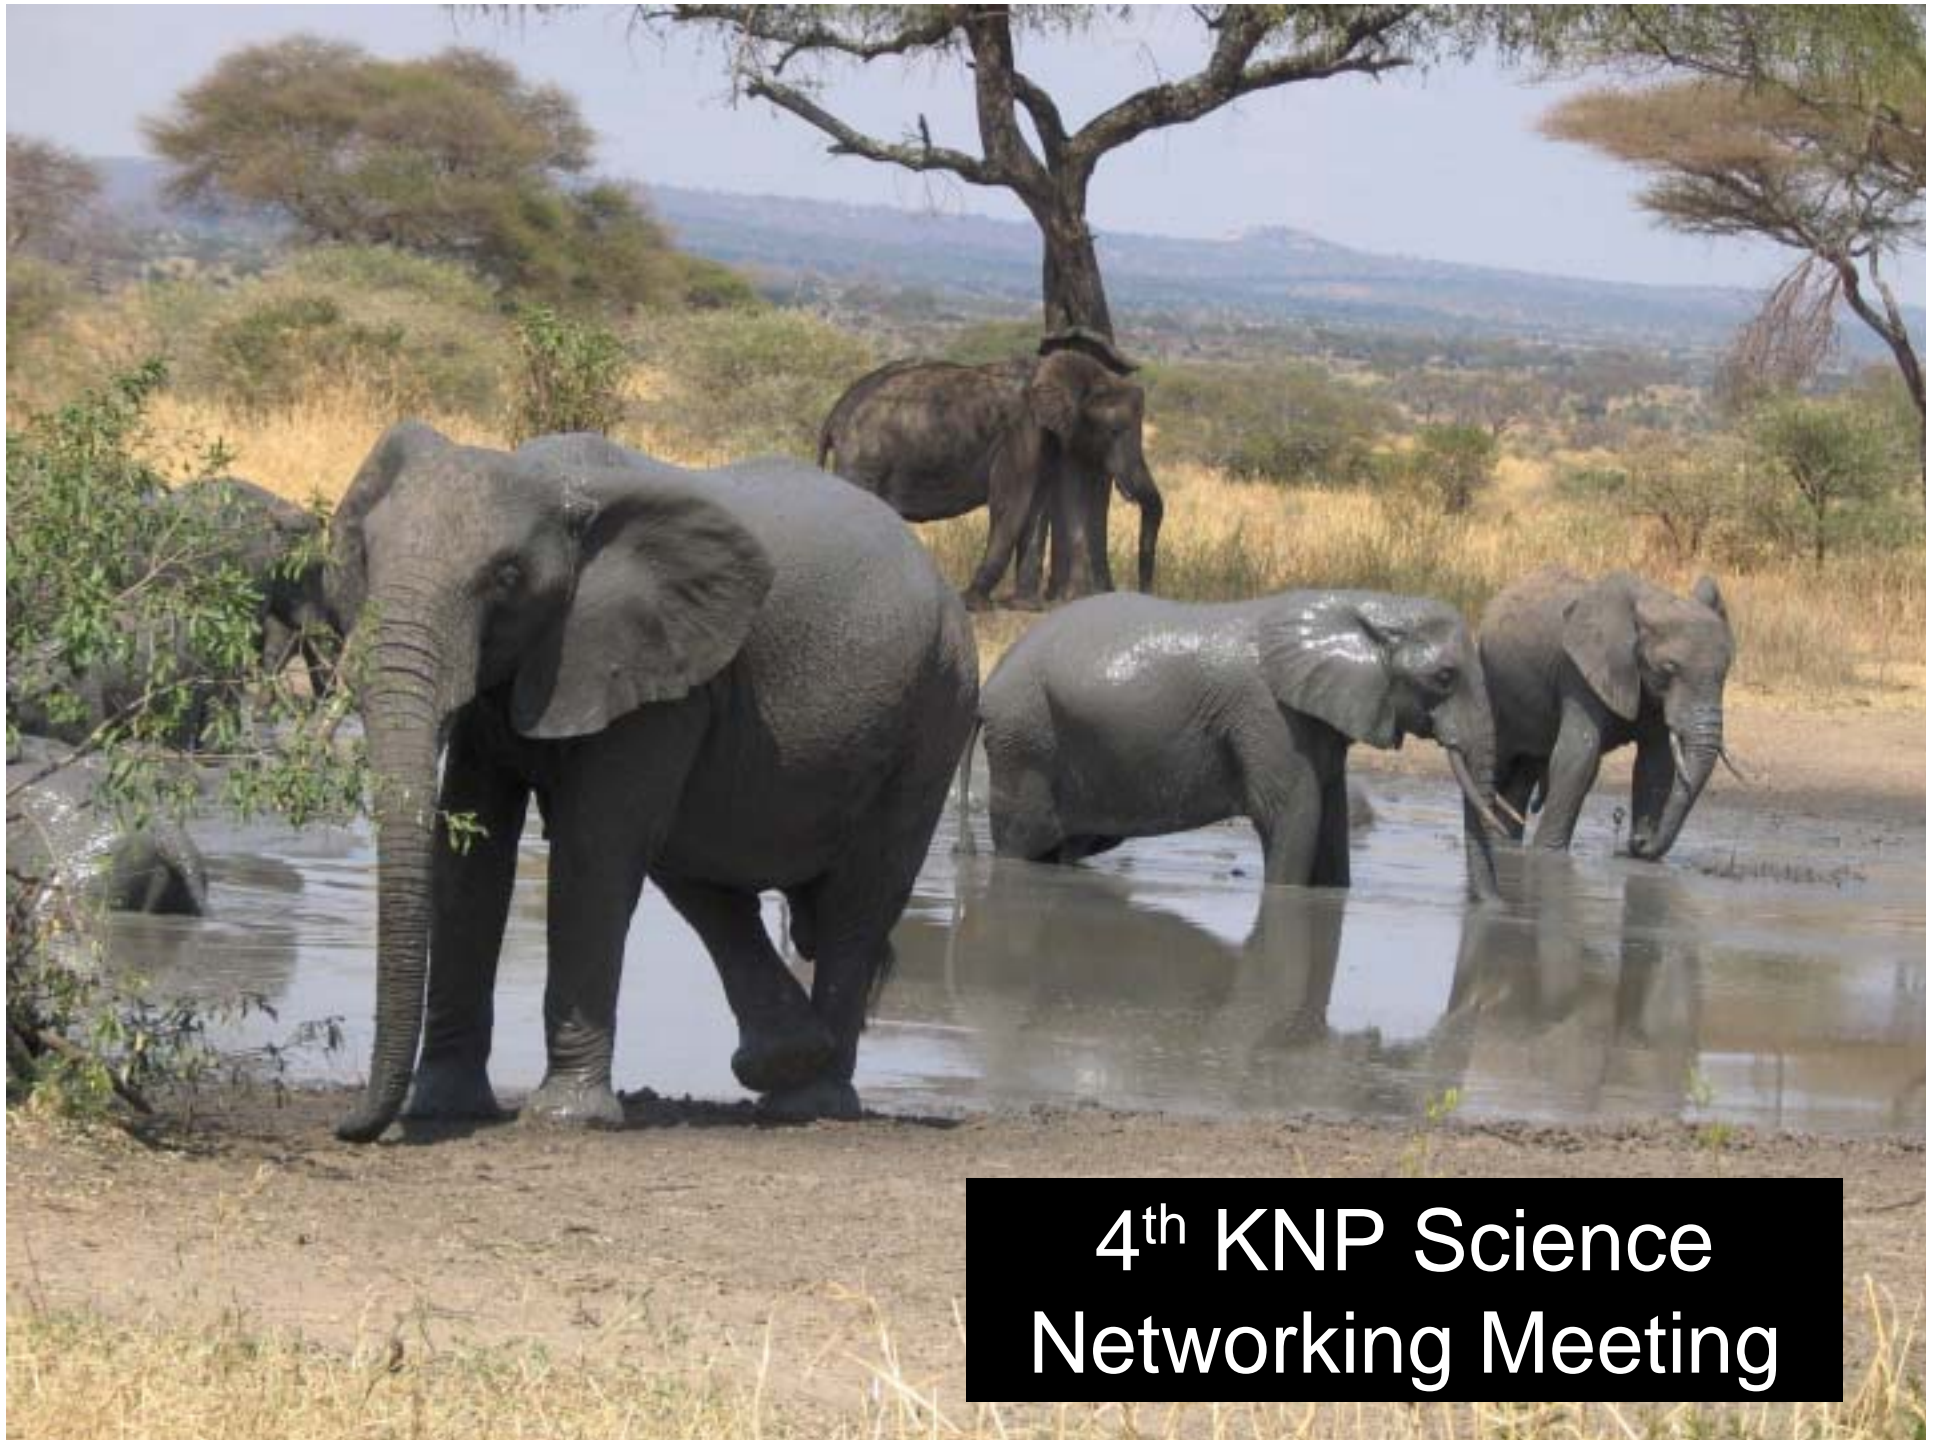

A photograph of a herd of elephants in a savanna landscape. The elephants are standing near a body of water, possibly a watering hole. The background features acacia trees and a hazy horizon. The image is overlaid with semi-transparent text.

We want to thank the organizers of the KNP Library Symposium, currently being held in Skukuza, for accommodating us following a booking mix-up on Friday

In an effort to give the proceedings a more local feel the meals are being prepared by local groups, i.e. the church, the nursery school and the primary school

HOUSE KEEPING

- There are a few small program changes: You can check with the program outside but we will announce them as well
- Transport to golf club – every night – use your own – you should have been given one at registration – else talk to Jackey
- Breakfast and lunch at Boma next to main tourist camp restaurant
- Internet – only available at café in tourist camp (there are 4 terminals) plus other printing and other office functions
- Gate between camp and scientific services is closed (permanently), please use the gate near to the post office
